ARDOUR™  
BROWS & LASHES

# Lash Aftercare

*Make Your Lash Extensions Last Even Longer!*

Do not wash eyes, swim or shower for the first 24-48 hours to allow adequate bonding time for the lashes.

Use only water-based facial cleansers and avoid any oil-based eye make-up removers.

Be gentle with your lashes and use your lash wand.

Do not use an eyelash curler.

Clean your lashes with a lash cleanser regularly to prevent build-up and infection.  
If a lash has turned, use your lash wand to brush it straight.

Brush your lashes daily.

Cold air-dry your lashes after getting them wet.

Avoid all oil-based products around your eye area. Oils will break down the adhesive.

If you must wear mascara or eyeliner, make sure it is oil free and safe to use with your extensions.
