Lash Aftercare

Make Your Lash Lift Last Even Longer!

Do not wet lashes for the first 24 hours.

Use of sauna/swimming is possible after 24 hours but may weaken the effect of the lift.

No other facial beauty treatments for 24 hours.

Avoid using oil-based products on your lashes for the first 24 hours.

Avoid using waterproof mascara because it often needs to be removed with an oil-based makeup remover.

Do not use oil-based eye products including skincare and/or makeup remover.

Be gentle with your lashes - no rubbing.

Lash lifts will last up to 6-8 weeks. Please do not re lift lashes any sooner than 4 weeks.

Use Ellebana Advanced After Care Formula for your lashes in between treatments.

It helps to maintain optimum lash lift results and promotes lash health.

If you're getting your lashes lifted on a regular basis we highly recommend you pamper your lashes with a Keratin Nourish treatment at your next lash lift service. Keratin Nourish strengthens your lashes and may help promote overall lash health. Your lashes will thank you for it!
